

Sample Punch pneumatic

large dimensions

Code: P.110.xxx

Usage

To prepare large dimension samples or A4 (210 x 297 mm) samples.

Device description

This robust and sturdy sample punch is ideal for the pneumatic punching of A4 samples or samples of large dimensions. The material is put between the safety and stainless steel guide. By using the foot switch the sample is cut out in the desired format via the especially designed punch tools. After the punching, the sample falls into the collecting tray and can be taken out easily. Safety switches and guides prevent the punch from being operated before the safety switch closes.

Specifications

- top-quality in materials and manufacturing
- premium cutting knives
- security protection
- stainless steel guide
- easy & ergonomic operation via foot switch
- sample collecting tray
- sample thickness: up to 7.5 mm (depending on the material)
- several samples (depending on the thickness) can be punched at the same time

Connections

Air: 8 bar/800 kPa for
 Ø8 mm compressed air tube

Delivery content

- Sample Punch
- 3 m air tube with 8 mm diameter
- user manual
- certificates
