

Wear Parts Kit

for Abrasion Tester AT 1000

Code: P.111.SP1

Effortless PVC assembly with special tool

Premium Wear Parts for 500 Abrasion Tests

Optimize your abrasion testing with your Abrasion Tester AT 1000 and our Wear Parts Kit. This kit includes high-quality wear parts for 500 standard tests.

Effortless Assembly of PVC Rings

Easily assemble PVC rings with our specialized tool, which is included as standard in the delivery of the abrasion tester. Don't have the tool? Contact *PTE Austria* to inquire about obtaining a spare.

Simplified Screen Identification

Our abrasion screens feature a convenient indication line, making it easy to identify the correct side for testing. Say goodbye to guesswork and enhance your testing efficiency with our user-friendly design.

Complete Your Kit

Left with only one type of wear part? No problem! Complete your set by purchasing the other wear parts individually. Benefit from the flexibility of replacing only what you need and ensure your equipment is always fully equipped for top-notch performance.

Insertion of wear plate and abrasion screen
