

Dennison Wax Set

General Product Code

P.900.xxx

Product Overview

The Dennison Wax Sets are a reliable solution designed to assess the pick resistance or surface strength of various paper and board materials.

How It Works

The wax stick is heated and applied to the surface of the sample, adhering with a certain adhesive power. It is then secured in place using the wooden pull block. Once cooled, the applied wax is carefully pulled from the sheet, allowing for thorough surface inspection.

Key Features

- suitable for both coated and uncoated paper
- range of adhesive power from grade 2A to 23A
- starter wax set includes 17 different wax sticks, alcohol lamp, wick and wooden pull block
- individual boxes contain 8 wax sticks of the same type

Applications

- paper and board manufacturing
- quality control and assurance
- research and development

Applicable standards

- TAPPI T459, ASTM D2482, CPPA D11

Available Models

| Code | Box Type | Code | Box Type |
|-----------|----------------------------|-----------|----------------------------|
| P.900.02A | Box with 8 pcs of type 2A | P.900.11A | Box with 8 pcs of type 11A |
| P.900.03A | Box with 8 pcs of type 3A | P.900.12A | Box with 8 pcs of type 12A |
| P.900.04A | Box with 8 pcs of type 4A | P.900.13A | Box with 8 pcs of type 13A |
| P.900.05A | Box with 8 pcs of type 5A | P.900.14A | Box with 8 pcs of type 14A |
| P.900.06A | Box with 8 pcs of type 6A | P.900.16A | Box with 8 pcs of type 16A |
| P.900.07A | Box with 8 pcs of type 7A | P.900.18A | Box with 8 pcs of type 18A |
| P.900.08A | Box with 8 pcs of type 8A | P.900.20A | Box with 8 pcs of type 20A |
| P.900.09A | Box with 8 pcs of type 9A | P.900.23A | Box with 8 pcs of type 23A |
| P.900.10A | Box with 8 pcs of type 10A | P.900.SET | Dennison wax starter set |
